

Kibo Citadel

Extraspace has developed a "box in box" technology that can be used for shelters/safe havens/safe rooms etc. The design involves sliding a secure bullet and blast proof Kibo room inside a standard ISO shipping container for camouflage (and for transport and storage).

- There are 2 sizes accommodating either 12 or 24 people.

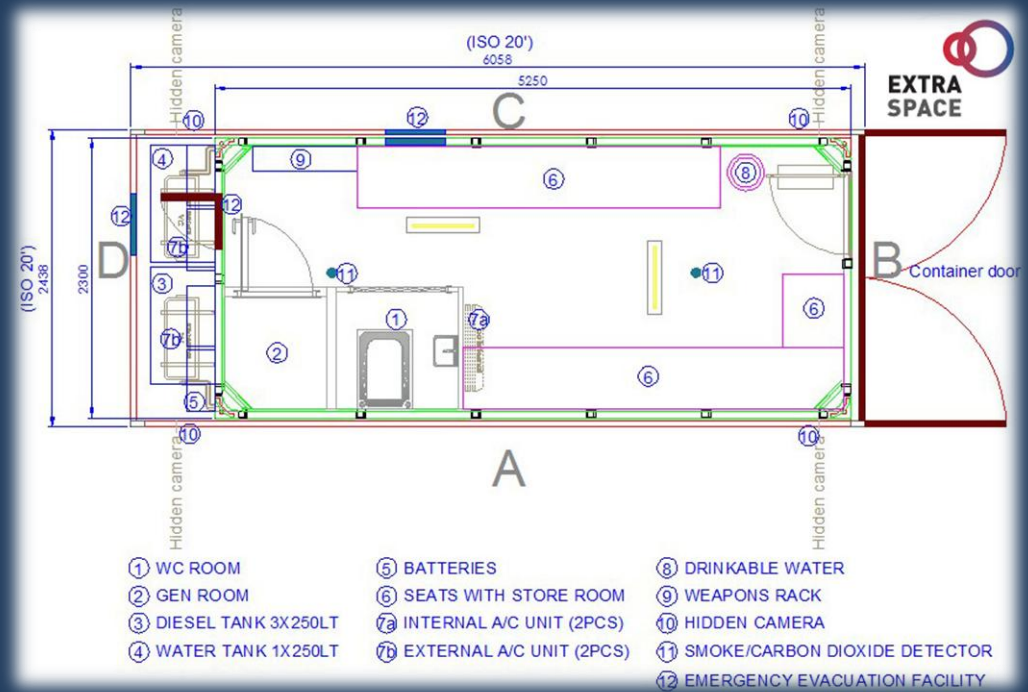

- Ideal as a refuge/ living or working accommodation
- Shelters are available with an extensive choice of options to meet specific needs

Proposed layout for 12 people

It is self-contained with:

- generator, batteries,
- A/C,
- water,
- WC,
- communications,
- CCTV,
- electrical installation,
- emergency evacuation facility,
- escape hatches,
- auto extinguish installation,
- medical kit OXIVAC II,
- gas masks etc.

... and can be locked down for several days if necessary, until help arrives.
