## Technical data sheet

---

### Fixed shelter rectangular section 20 m

*AFSR20 - Rev00*

---

**Metallic frame structure with textile cover in traditional shape with high climatic resistance**

**Climatic Resistance :**

Wind : 200 km/hour

Snow : 100 daN/m<sup>2</sup>

**Sizes :**

Bays 20m

Height : 6m to 10m

Length: as per requirement

Canvas in double curve for the roofing and lateral walls

Galvanized steel framework easily dismantled and transportable

**Access :**

Horizontal sliding doors available for complete opening of the side between two piles

Classic sectional manual truck doors or resistant high winds to (hydraulic)

**Options :**

Air conditioning – Dry air – Lighting

**Applications :**

Warehouse with natural lighting and atmospheric control. The construction is completely watertight with anti-condensation and anti-corrosion systems working at low power.
