

Oxley Launches NVIS Compatible Rear Mount LED indicator STR502

Oxley is delighted to announce the launch of a new NVIS compatible rear mount LED indicator. The STR502 lamp has been designed to meet a growing customer demand for high specification rear mounted panel lamps with special features.

The 8mm lamps meet IP68 sealing and are available as a bi-colour option (2STR502), a sunlight viewable solution and an NVG option is available. The lamp has been designed with a configuration option to meet MIL-STD-3009 Lighting Aircraft, Interior Night Vision Imaging System (NVIS) Compatible*. The lamps are suitable for the most challenging of environments including military, aerospace and telecommunications.

Oxley STR502

The lamps are made with a small and compact case design in aluminium with a black nickel or chromate finish and come in a range of eight standard & high intensity colours and eight NVG colours. As with all of the Oxley lamps, these high performance products are available in a wide variety of configurations to suit the required application.
