

## Gain free hints and tips - Register for online presentations

Discover exciting new thermal techniques by joining one of METTLER TOLEDO's free online seminars today. Simply visit [www.mt.com/ta-webinars](http://www.mt.com/ta-webinars) to register. Upcoming live topics include:

- **Thermogravimetric Analysis (TGA) – Thursday 31 May:**  
Improve sample quality by discussing the importance and principles of thermal analysis and the variety of measurement possibilities available.
- **Kinetics in Thermal Analysis – Thursday 28 June:**  
Understand why Kinetics is important and explore this process looking at information on aging, stability, product lifetime and shelf life.
- **Thermal Analysis of Thermosets – Thursday 26 July:**  
Discover some interesting applications and learn about the 4 main thermal analysis techniques useful for studying thermosets.

### Missed a presentation?

You can now watch free online presentations on a variety of Thermal Analysis techniques on-demand. Available 24/7, view at your own convenience. Visit [www.mt.com/ta-webinars](http://www.mt.com/ta-webinars)

Keep up-to-date about Thermal Analysis instruments by visiting [www.mt.com/ta](http://www.mt.com/ta) - where you can discover more about the entire product range, news, software and much more. Alternatively email [enquire.mtuk@mt.com](mailto:enquire.mtuk@mt.com)
