

Tips and tricks to simplify your Laboratory workflow

Work in Chemical Labs can be tedious, stressful and hazardous at times. Numerous processes have to be followed, safety standards have to be remembered as well as having to study instrument manuals to work accurately.

METTLER TOLEDO has launched a new website that addresses these topics in an interactive way. Focusing on laboratory instrument features, it highlights how operators can work easier, faster and safer. Simply visit www.mt.com/ChemLab to meet the Smart Helpers - small robots who explain the advantages and benefits of these relevant features.

Interactive game + free booklet and money off

Have a go on the interactive game, watch videos and learn how to improve processes.

In addition download free booklets with tips and tricks on melting point determination, accurate weighing and refractometry to optimise your results. Plus be entered in a prize draw to win **£500 off** a METTLER TOLEDO lab instrument. Visit www.mt.com/ChemLab
